Class -6 Science

Chapter-3 "FIBRE TO FABRIC"

Learn and write the following definitions-

1- Fibres- The thin strands of thread is called fibres.

2- Yarn- It is a spun thread used for knitting, weaving or sewing.

3- Fabrics- Fabrics are made up of yarns and yarns are further made up of fibres.

4- Natural Fibres- The fibres of some fabrics such as cotton, jute, silk and wool are obtained from plants and animals. These are called natural fibres.

5- Synthetic Fibres- The fibres are made from chemical substances, which are not obtained from plant or animal sources. These are called synthetic fibres.
